Saturday, 11st July, 2015

VENUE:
Hotel Mayfair Lagoon, Jaydev Bihar, Bhubaneshwar

In Association with ICP & API Odisha Chapter

Abbott
A Promise for Life

Abbott
A Promise for Life

Dear Doctor

I would like to take this opportunity to thank you all for the tremendous response making API-DIAS a huge success all across the country. As we experience a continuous transformation of the global healthcare industry and its practices, the need was for a connected approach based forum that focuses on topics of high importance every time. We at Abbott Healthcare understood this need and with Association of Physicians of India (API) executed the unique initiative API-DIAS, across India.

Continuous Medication Education in healthcare was confined but with API-DIAS we challenged this paradigm and set a new benchmark of reach for a CME. Last year API-DIAS reached across 33 cities nationwide educating over 6000 physicians helping them garner substantial learning.

Following the success of this unique initiative we are advancing to the next phase where our aim is to focus on 'Enhancing Practice' through case based learning. We continue to be dedicated helping physicians successfully guide their way through the ever evolving healthcare needs by promoting practices that can result in improved health outcomes for patients and enhance clinical practice. This program will further add learning on diagnosis and appropriate treatment modalities and protocols to ensure better patient outcomes.

While we are proud and honoured to invite you to the next phase of this unique initiative, at the same time request your gracious presence to make this phase an even bigger success.

Thanks and Regards,

Sudarshan Jain
Managing Director,
Abbott Healthcare Solutions

Dear Friend

As you are aware, Association of Physicians of India (API) always thrives for improving the healthcare standards in the country and aligning with this objective we have taken many initiatives targeted at capacity building of our fellow clinicians with an aim of keeping patients at centre of all we do. This year my presidential theme is Generating Indian Evidence. You are a national expert in your therapy area and we are keen to engage you to develop national protocol and guidelines as well.

Last year we have launched one of its kinds of initiative API-DIAS (Dissemination of Updated Information through API Speakers) in 33 cities in the country educating over 6000 physician (MD medicine) on latest guidelines and treatment methodologies across all therapeutic areas covering both chronic and acute field. Looking at the tremendous popularity of the program across India, we have decided to take the initiative forward in 2015-16. The theme of the program will be "Enhancing Practice" and the central executive committee had decided to include case based approach to enrich knowledge level of our fellow colleagues.

We are positive and confident that Phase II of this unique initiative will surely benefit our fellow physicians' and help them deliver enhanced care for patients and further strengthen the healthcare system in the country.

Thanks & Regards,

Dr Rajesh Upadhyay
President - Association of
Physicians of India
